PART 1:

GOOGLE FORMS

What is Google Forms?

- A web-based application under Google Workspace that allows users to create digital forms, surveys, questionnaires, quizzes, and registration forms and collect responses electronically.

Purpose of Google Forms

Data Collection

Allows users to gather information, responses, and other data from multiple people in one organized form.

Purpose of Google Forms

Surveys and Questionnaires

Helps collect opinions, preferences, experiences, or other information from respondents.

Purpose of Google Forms

Quizzes and Assessments

Allows users to create online quizzes with answer keys, points, and automatic scoring.

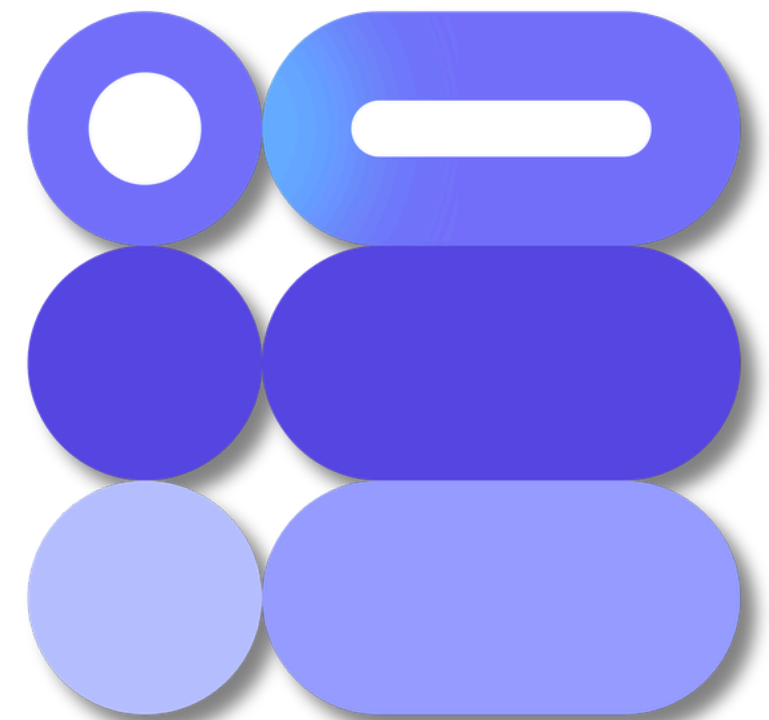

Purpose of Google Forms

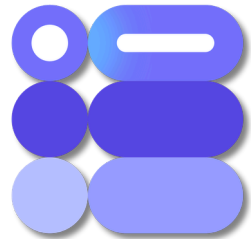

Feedback Collection

Enables users to gather comments, evaluations, and suggestions from participants.

Google Form 101

The screenshot displays the Google Forms editor interface. At the top, the title 'Untitled form' is followed by a star icon. To the right are icons for a checklist, a palette, an eye, undo, redo, a link, a person icon, a 'Publish' button, a vertical ellipsis, and a profile picture. Below this is a navigation bar with 'Questions', 'Responses', and 'Settings' tabs. The main area shows a form titled 'Untitled form' with a 'Form description' field. Below the description is a question titled 'Untitled Question' with a 'Multiple choice' type selected. The question has two options: 'Option 1' and 'Add option or add "Other"'. At the bottom right of the question box are icons for a copy, a trash, a 'Required' toggle switch, and a vertical ellipsis. On the far right is a vertical toolbar with icons for adding a new question, a new form, text, image, video, and a table.

PART 2:

GOOGLE MEET

What is Google Meet?

- a video calling tool made by Google that lets you talk to, see, and work with other people online from your phone, tablet, or computer.

Purpose of Google Meet

Virtual Meetings

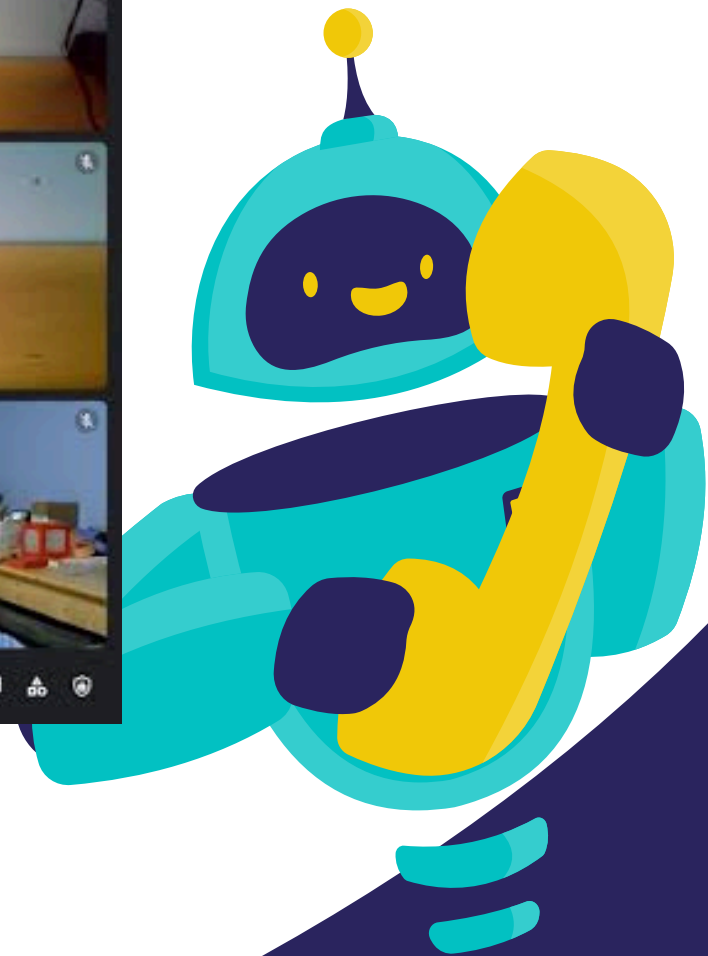

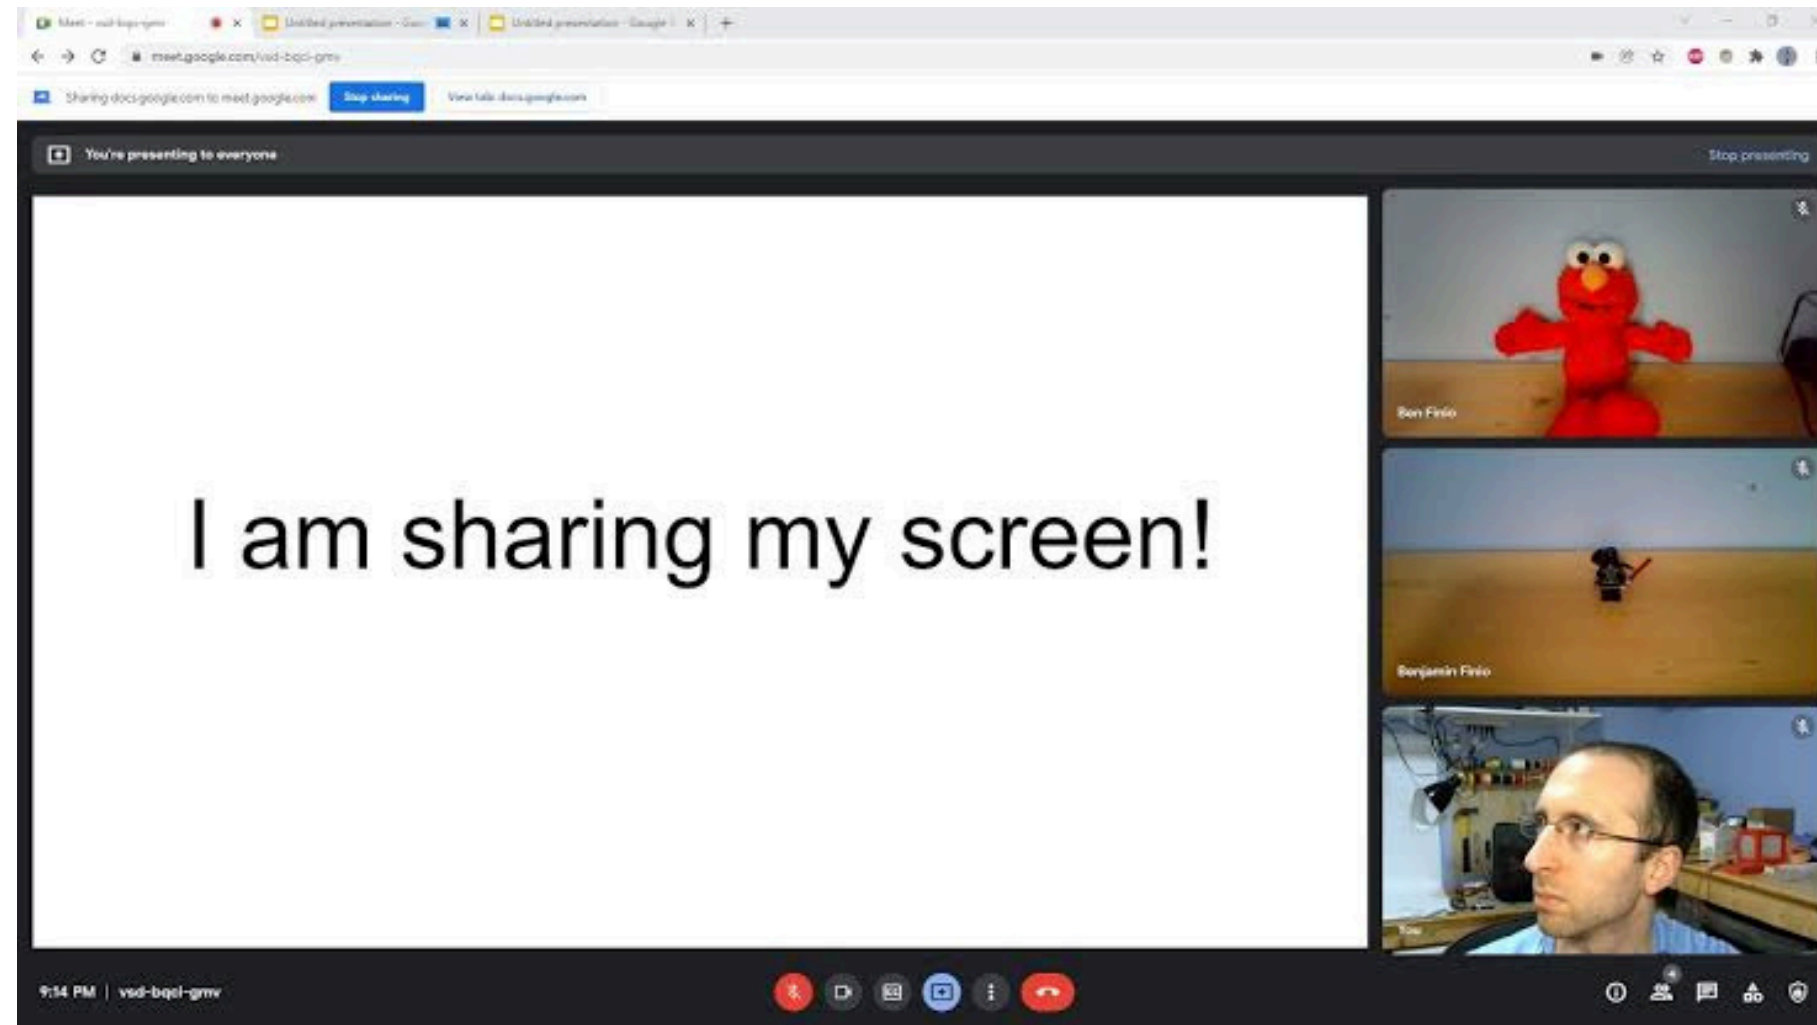

Host 1-on-1 or group video/audio calls with up to 100 participants (free version).

Purpose of Google Meet

Screen Sharing

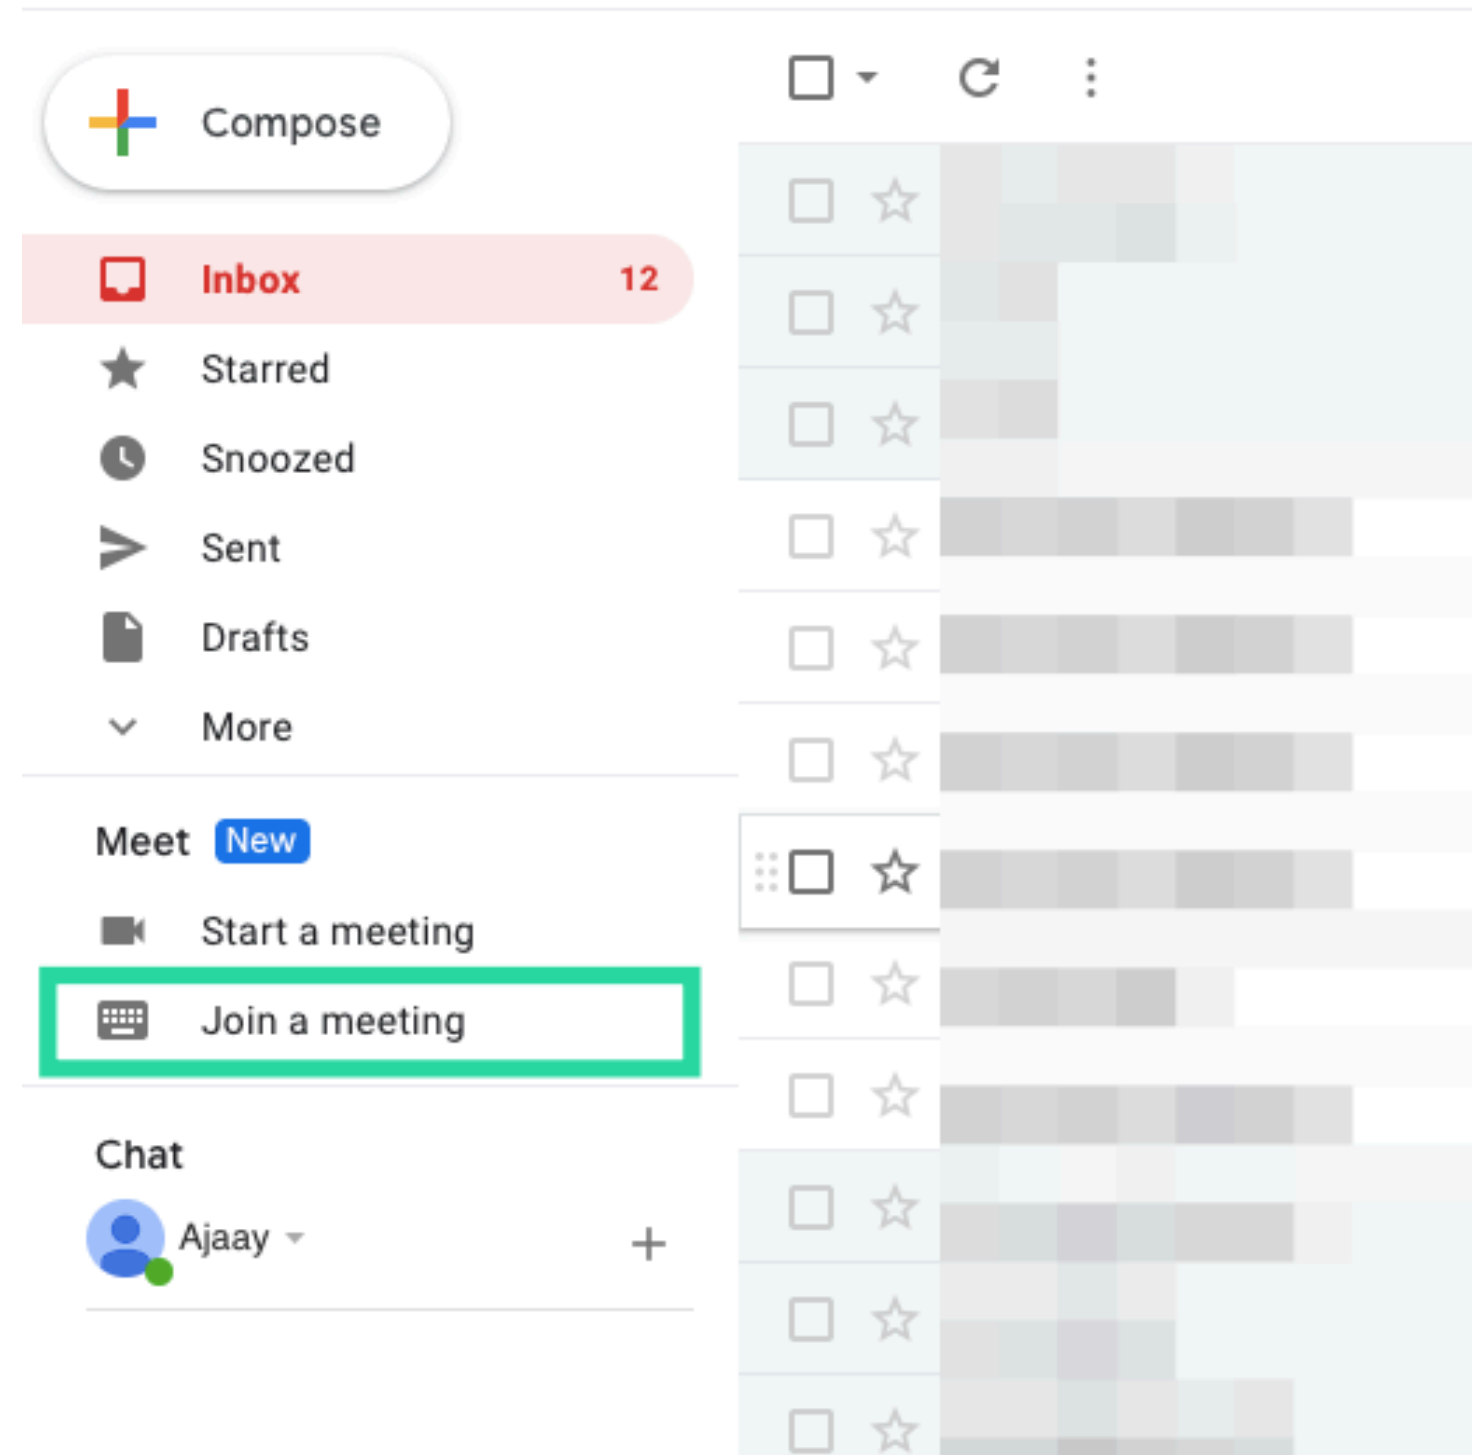

Present slides, documents, or your entire screen live.

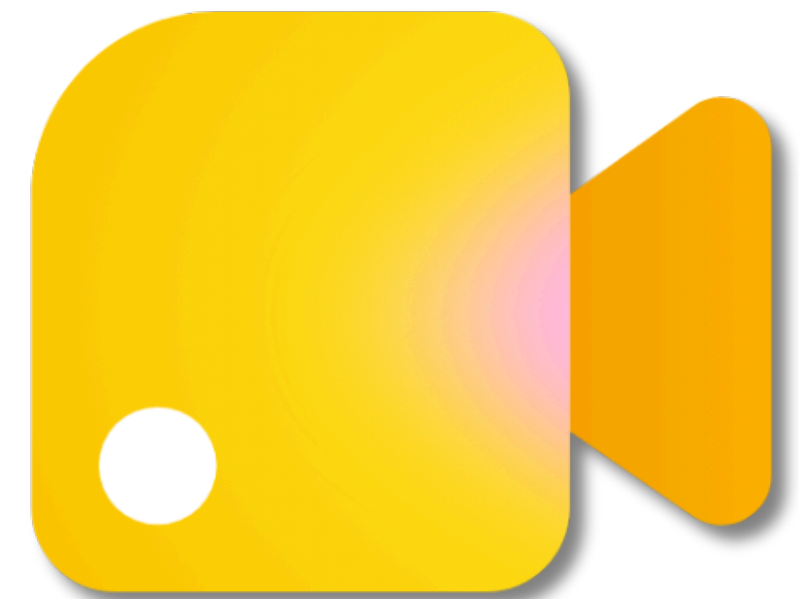

Purpose of Google Meet

Google Integration

Schedule and join calls directly via Gmail and Google Calendar.

Features & Functions

Features & Functions

Video and Audio Calls

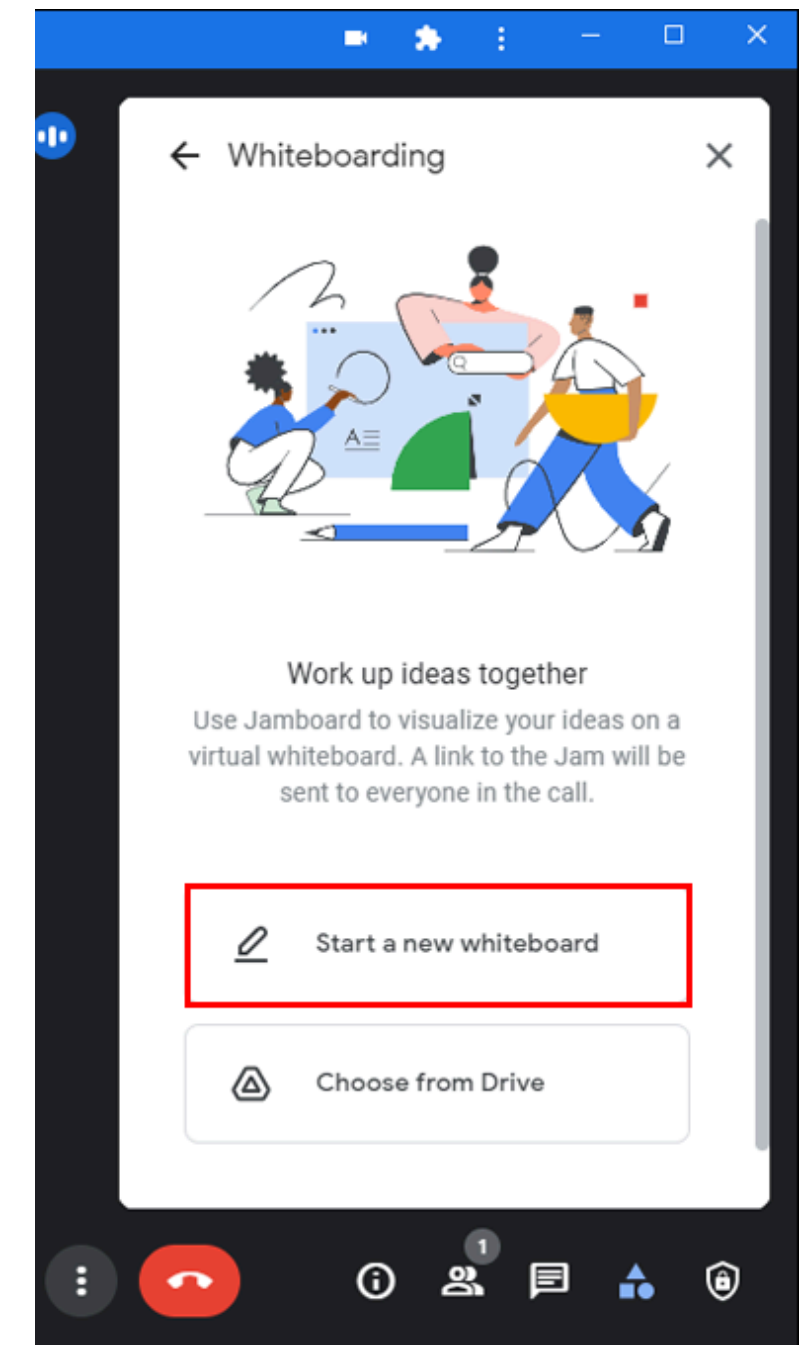

- ***High-Definition Video***: Supports real-time video meetings with up to hundreds of participants.
- ***Noise Cancellation***: Uses AI to automatically filter out background noise like typing, dogs barking, or construction.
- ***Visual Effects***: Offers background blur, custom background images, and video lighting adjustments for low-light environments.

Features & Functions

Collaboration and Engagement

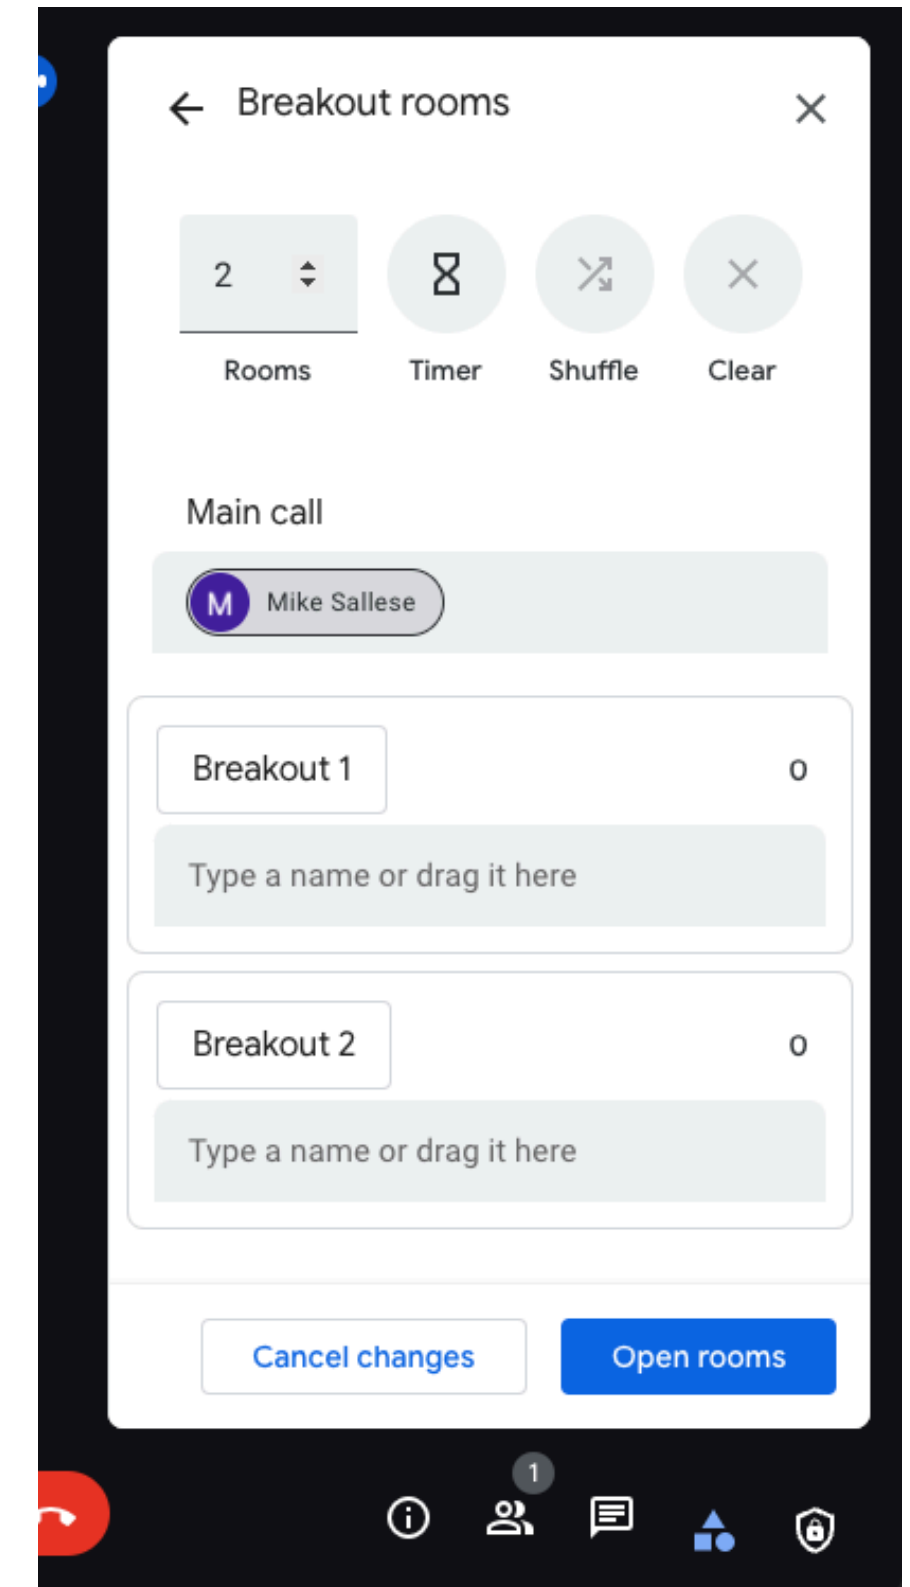

- ***Screen Sharing (Presenting)***: Allows users to share their entire screen, a specific app window, or a single web tab (ideal for sharing video with clear audio).
- ***Interactive Whiteboard***: Integrates with digital whiteboards so participants can brainstorm and draw together live.

Features & Functions

Collaboration and Engagement

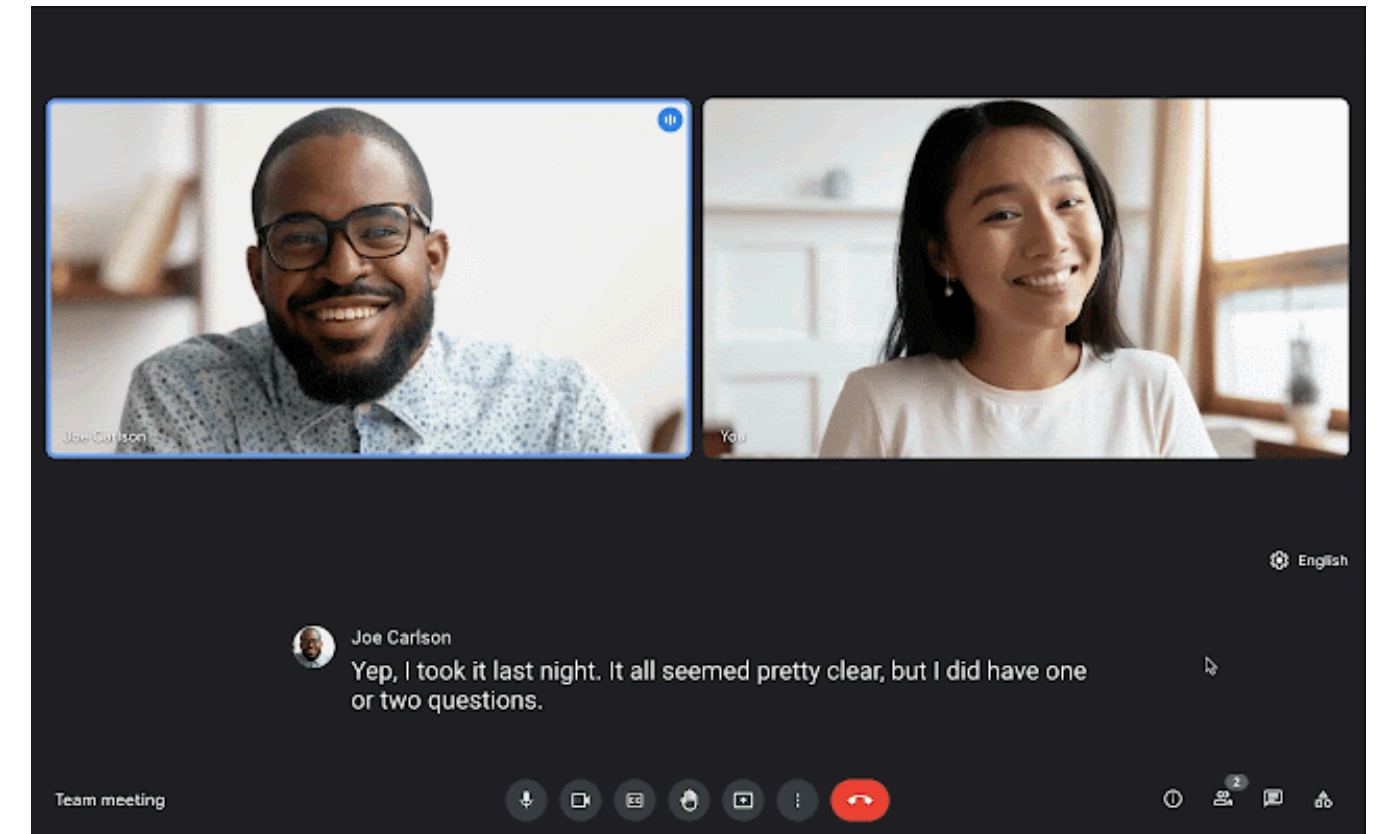

- ***Breakout Rooms***: Enables hosts to split main meeting participants into smaller sub-groups for focused discussions.
- ***In-Meeting Engagement***: Includes live polling, Q&A sections, and a "Raise Hand" button to manage spoken turn-taking smoothly.

Features & Functions

Accessibility and Controls

- ***Live Captions:*** Automatically generates real-time text transcriptions of spoken dialogue in multiple languages.
- ***Host Controls:*** Gives session hosts the ability to mute participants, disable participant cameras/screen sharing, or lock the meeting room.

Features & Functions

Accessibility and Controls

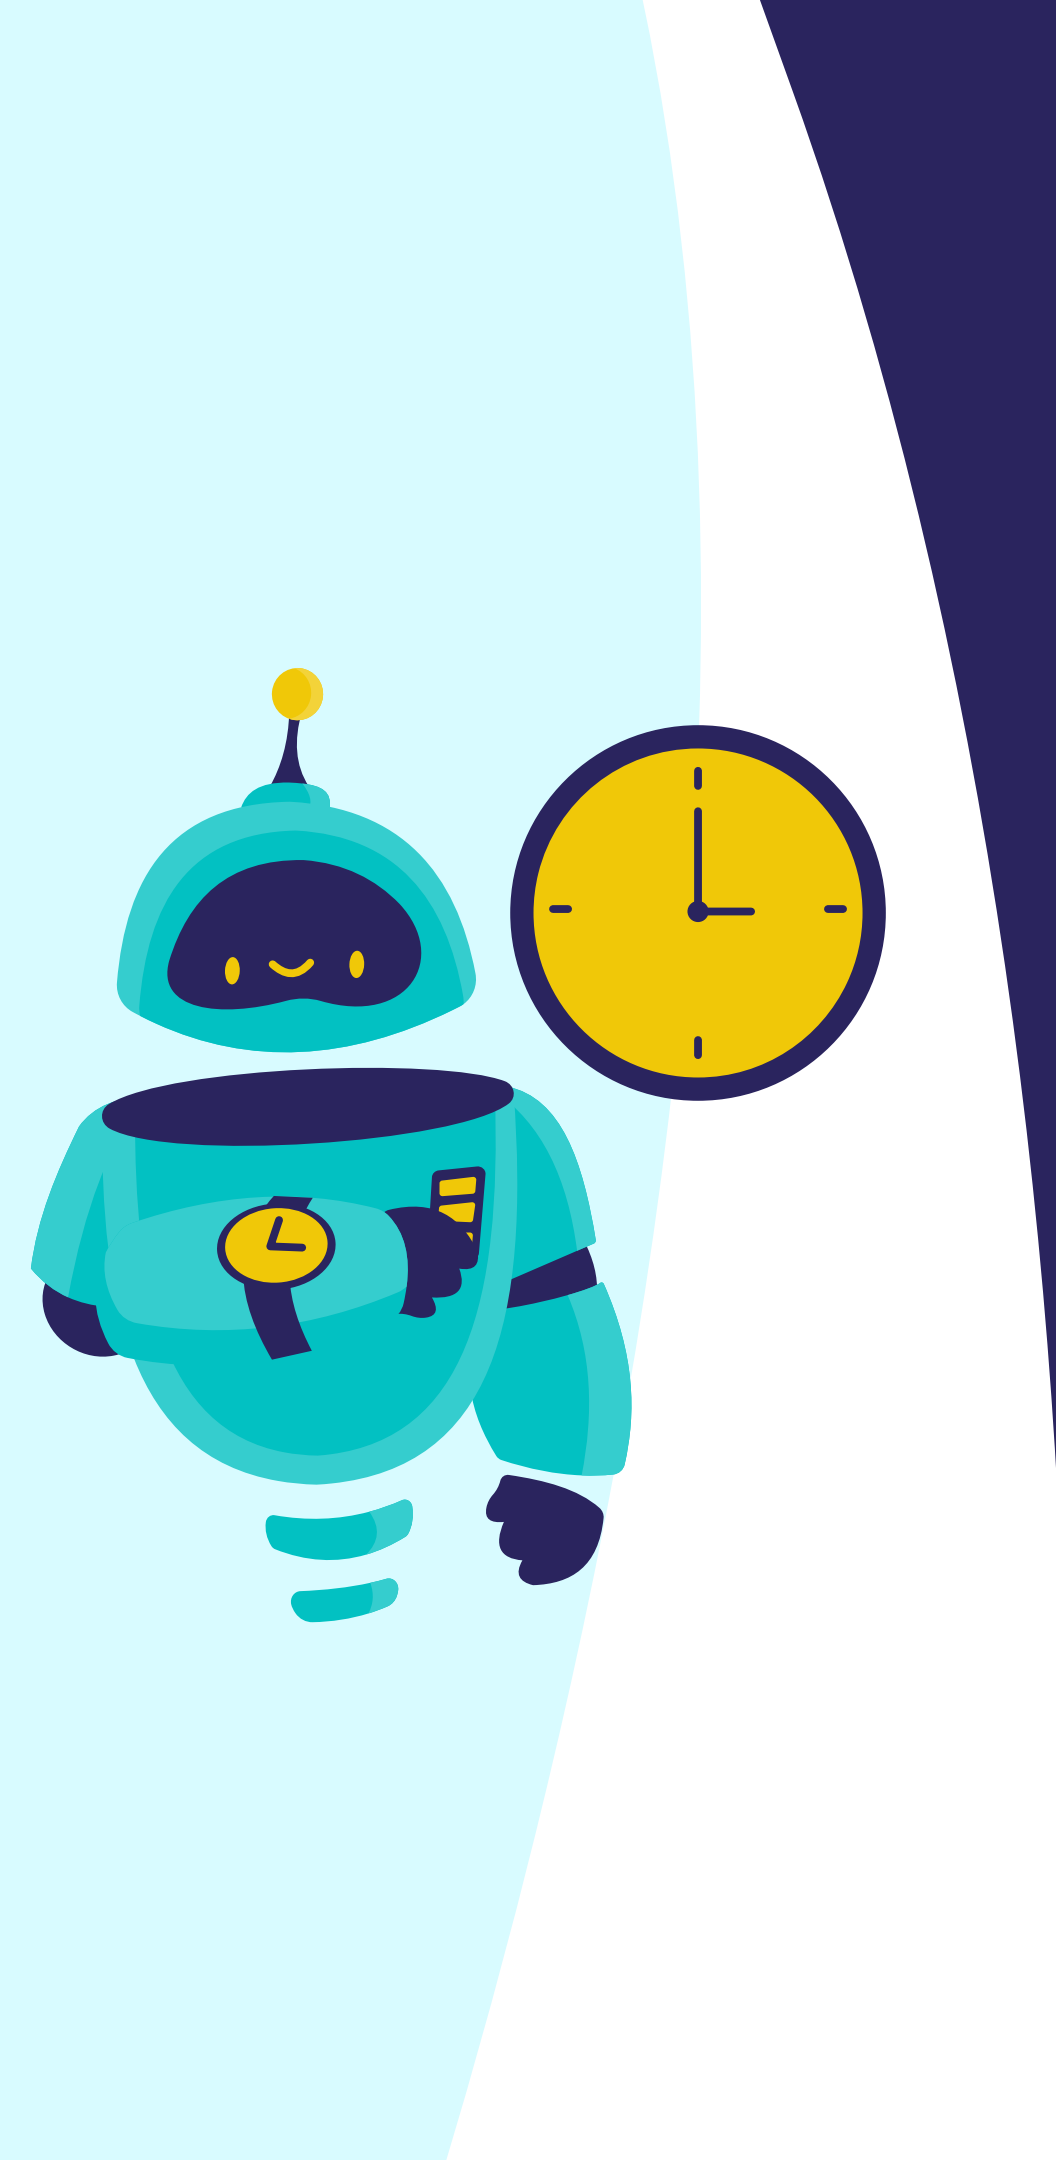

- ***Workspace Integration:*** Allows users to schedule, join, or launch meetings directly from Google Calendar, Gmail, Google Chat, or within Google Docs, Sheets, and Slides.
