Objective:
-To make a detailed one page advocacy page

Prompt from Claude:

“Build a modern, visually striking ONE-PAGE advocacy project website for the cause "Clean Water Access for Rural Communities". The project name is "Every Drop Counts", the tagline is "Clean water is a right, not a privilege", and the campaign hashtag is #EveryDropCounts. If you want a different cause, change only this first sentence and adapt all the content to it.

TECH STACK
- Plain HTML, CSS, and vanilla JavaScript in three files: index.html, style.css, and script.js. No frameworks and no build step, so it runs instantly in Replit's preview.
- Mobile-first and fully responsive for phone, tablet, and desktop.
- Semantic HTML, smooth scrolling, alt text on all images, ARIA labels, good color contrast, and keyboard-friendly navigation.
- Google Fonts and Font Awesome (or inline SVG) for icons.

DESIGN DIRECTION
- Mood: hopeful, bold, human, and trustworthy.
- Colors: deep navy #0B1D3A as the base, coral #FF6B4A as the main accent, warm yellow #FFC857 as the secondary accent, off-white #FAF7F2 for backgrounds, and soft teal #2EC4B6 for highlights.
- Fonts: Poppins (700-800) for headings and Inter for body text.
- Style: rounded cards with soft shadows, large bold headlines, generous white space, and wave or diagonal SVG dividers between sections.
- Decorative elements: gradient backgrounds, floating blob shapes, subtle dotted patterns, water-drop motifs, and icon circles with gradient fills.
- Images: relevant Unsplash placeholder images with rounded corners and color overlays, loaded lazily.
- Micro-interactions: cards lift on hover, buttons glow and scale on hover, sections fade and slide up on scroll (IntersectionObserver), and stat numbers animate counting up.

PAGE SECTIONS (in this order, all on one page)
1. Sticky navbar: logo and name on the left, anchor links (About, Issue, Impact, Get Involved, Stories, FAQ), and a highlighted "Take Action" button. It is transparent at the top and turns solid with a shadow on scroll. Include a hamburger menu on mobile.
2. Hero: full-screen background image with a navy gradient overlay, a huge headline, a one-sentence mission statement, and two buttons ("Join the Movement" and "Learn More"). Add an animated scroll-down arrow and floating decorative shapes.
3. The Issue: a short, powerful paragraph beside an image (two columns), plus 3 stat cards with icons and animated counters: "2.2 billion people lack safe drinking water", "1 in 3 rural schools have no clean water", and "80% of illness is linked to unsafe water".

4. Our Mission and Goals: a mission statement and 4 goal cards with icons, short descriptions, and hover effects (Build wells, Install filters, Teach hygiene, Push for policy).
5. Our Campaign Timeline: a vertical timeline with 4 phases (Awareness, Education, Community Action, Policy Change), each with an icon, a date, and a short description.
6. Our Impact: a bold colored band with 4 animated counters (people reached, volunteers, communities served, funds raised) and an animated progress bar showing the current fundraising goal.
7. Get Involved: 3 action cards (Volunteer, Donate, Spread the Word) with buttons, plus a "Sign the Pledge" form (name, email, short message, consent checkbox) with JavaScript validation and a friendly thank-you message on submit.
8. Stories: a testimonial carousel with 3 testimonials, each with a photo, quote, and name, with auto-sliding and clickable dots.
9. FAQ: an accordion with 5 questions that expands and collapses smoothly.
10. Final Call-to-Action: a large banner with the headline "Be the change" and a prominent button on a contrasting background.
11. Footer: logo, short description, quick links, social media icons, contact email, newsletter signup input, and a copyright line.

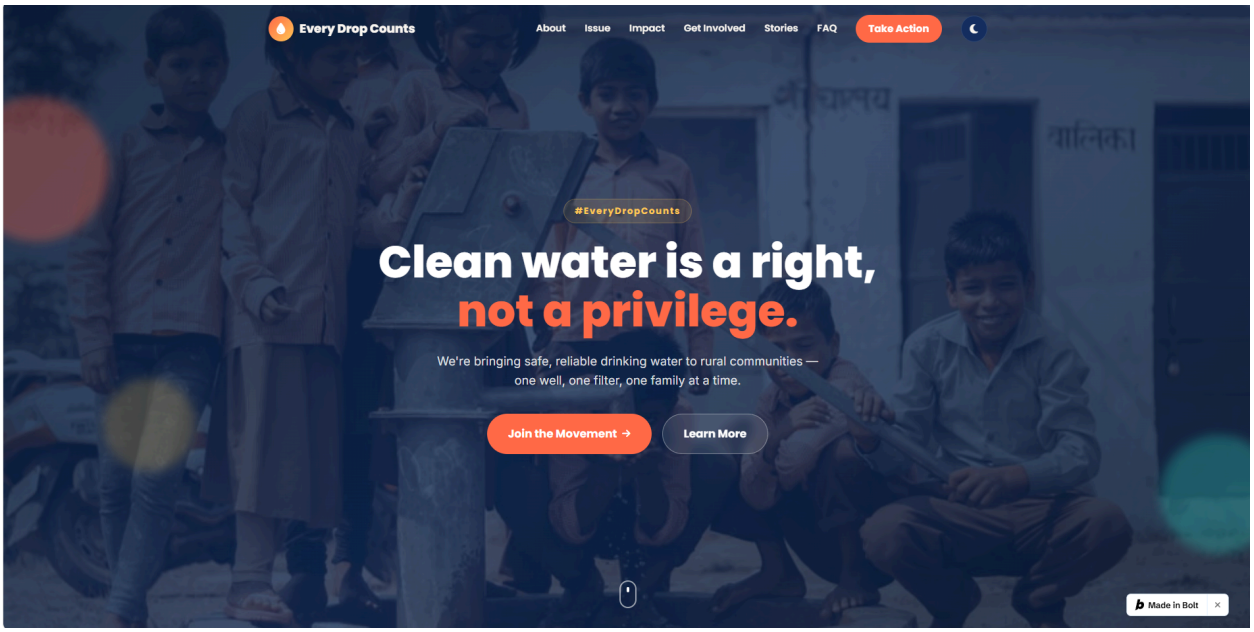

EXTRA FEATURES
- A floating "Back to top" button that appears after scrolling.
- Active nav link highlighting based on the section currently in view.
- Social share buttons using the hashtag #EveryDropCounts.
- An optional light/dark mode toggle.

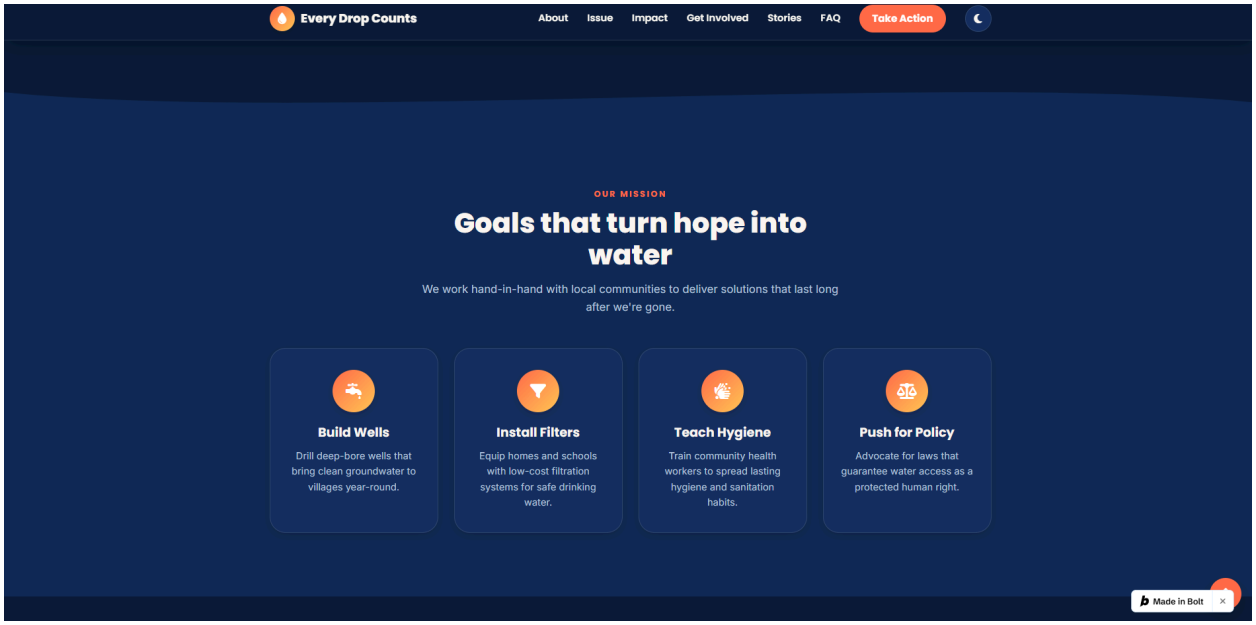

CONTENT
- Write persuasive, emotional, but factual copy. Keep paragraphs short and scannable, use an inspiring tone, and start calls to action with strong verbs.

OUTPUT
- Clean, well-commented code that works immediately when I press Run in Replit.”

Reflection:

During this activity, I realized that technology has come a long way from what I thought was possible in my time. I thought that tech that allows you to have access to limitless information was the breakthrough of the century, and a few decades later, we not only have a tool to parse the said information, but also use it at around the same level of an average expert in that field. We now have a lot more freedom since we now have tools to help us do the things we want. If I wanted to make a website as an amateur coder, I can have ai design and code it for me, I just need to clean up its mistakes.
