• Bachelor of Science in Electrical Engineering — Ateneo de Davao University (2024 Present) (3rd Year Student)
• STEM strand — Mapua Malayan Colleges of Mindanao (2020–2024)

ChatGPT:

NOEL JOB C. SILVERON

Electrical Engineering Student | OJT Applicant

Ecoland, Davao City, Philippines
09263325667 | nsilveron@addu.edu.ph

PROFESSIONAL SUMMARY

A third-year Bachelor of Science in Electrical Engineering student at Ateneo de Davao University, eager to gain practical industry experience through an On-the-Job Training (OJT) program. Enthusiastic about applying academic knowledge to real-world engineering challenges, developing technical skills, and contributing positively to a professional team. Demonstrates a strong willingness to learn, adapt, and grow in the electrical engineering field.

EDUCATION

Ateneo de Davao University
Bachelor of Science in Electrical Engineering
2024 – Present | Third-Year Student

Mapúa Malayan Colleges Mindanao
Senior High School – STEM Strand
2020 – 2024

CAREER OBJECTIVE

To obtain an Electrical Engineering OJT position where I can apply my academic foundation, gain hands-on experience in electrical systems and engineering practices, and develop the professional competencies necessary for a successful career as an Electrical Engineer.

TECHNICAL SKILLS

- Fundamental knowledge of electrical engineering principles
- Basic understanding of electrical circuits and analysis
- Academic foundation in electrical systems and engineering mathematics
- Willingness to learn technical software and industry-standard practices

PERSONAL ATTRIBUTES

- Adaptable and eager to learn
- Responsible and detail-oriented
- Team-oriented with a positive attitude
- Committed to continuous learning and professional development

Noel Job C. Silveron

Electrical Engineer Trainee (Entry-Level / OJT Applicant)

Ecoland, Davao City · 09263325667 · nsilveron@addu.edu.ph

Professional Summary

Electrical Engineering student, 22, eager to gain real-world experience through an OJT program. Enthusiastic about applying academic knowledge in a practical setting and contributing to a professional team.

Education

Bachelor of Science in Electrical Engineering — Ateneo de Davao University 2024 – Present · 3rd Year Student

STEM Strand — Mapua Malayan Colleges of Mindanao 2020 – 2024

Objective

To secure an Electrical Engineer Trainee / OJT position where I can build hands-on skills, learn from experienced engineers, and contribute to the team's projects.

Reflection:
This activity involved using two large language models Claude and ChatGPT to generate a professional one-page resume using the same prompt. Comparing their outputs provided great insight into how different AI tools interpret identical instructions.

Overall, ChatGPT produced the better result. This is because ChatGPT was more verbose and provided more detailed information that would help with my prompt. As a student who hasn't had his OJT yet, my qualifications are not yet appealing to professionals. ChatGPT assisted me by adding skills that I have but did not mention since it is difficult to articulate my level of expertise, while Claude simply made a resume format and added the information in my prompt. This exercise taught me that in prompting there are addons to the prompt that you will do and it's in your prerogative whether it is needed or not. I also learned that different AI models have unique strengths and comparing them critically ensures a much higher quality final product than simply accepting the first draft you receive.
